

# Flood Search and Rescue Management

[SAR-014]

## Program of Instruction

**Course:** Flood Search and Rescue Management - SAR-014

**Course Objective:** To improve the management of search and rescue operations after a flood.

This highly interactive, capability-building course will improve the participant's knowledge, skills and ability to efficiently search and account for a population of unknown numbers of people and animals. By using proven and systematic best practices, the authority having jurisdiction (AHJ) can make an informed and timely decision about **how** and **when** to *suspend* or *expand* the search effort. **Note:** *This is an interactive, capability-building search management course, not a water skills class.*

**Course Audience:** Intended participants are supervisory and command level responders, emergency managers and any others who are accountable for their citizens after a flood event.

Audience includes municipal, county, state, tribal and federal agency representatives from the **Public Sector** (*law enforcement, fire service, emergency medical, emergency management, search & rescue, CERT, military, etc.*) and the **Private Sector** (*industrial operations, remote operations, etc.*).

**Course Length:** Eight (8) total hours; the course can be delivered in **two separate 4-hour modules** on separate days or evenings or can be delivered in **one 8-hour module**.

**Prerequisites:** none

**Class size:** minimum 10 participants – maximum 36

**Certificate:** TEAM Solutions Certificate of Completion

**C.E.U.:** 0.8 CEUs

**Required Personal Protective Equipment:** none

**Location:** Client site (basic A/V requirements)

# Flood Search and Rescue Management

[SAR-014]

## Program of Instruction

---

### Course Topics
